

Effective Load Testing Tool Revealed

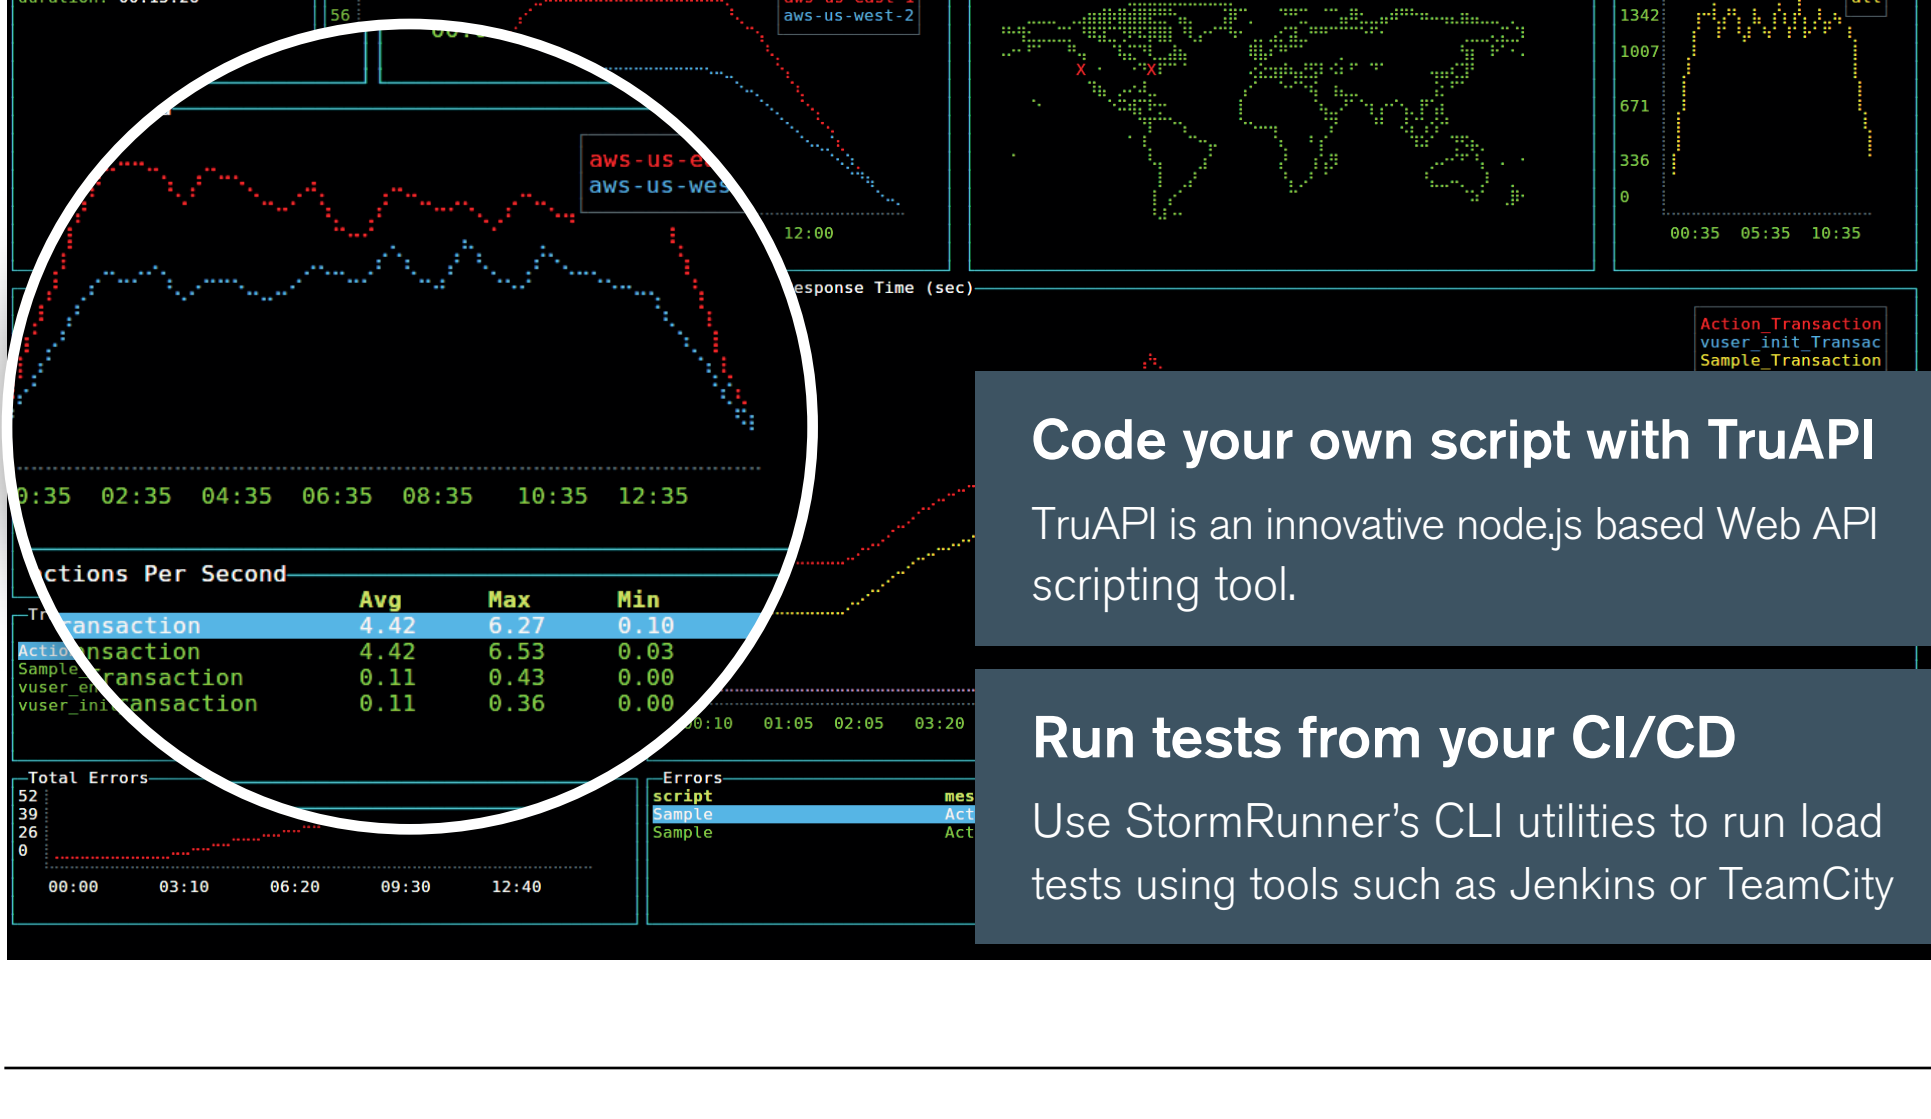

StormRunner Load in a nutshell

It is so simple you run tests in few clicks

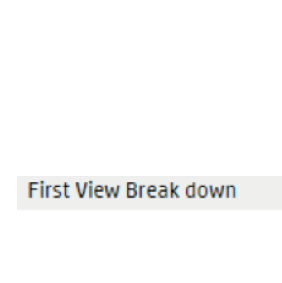

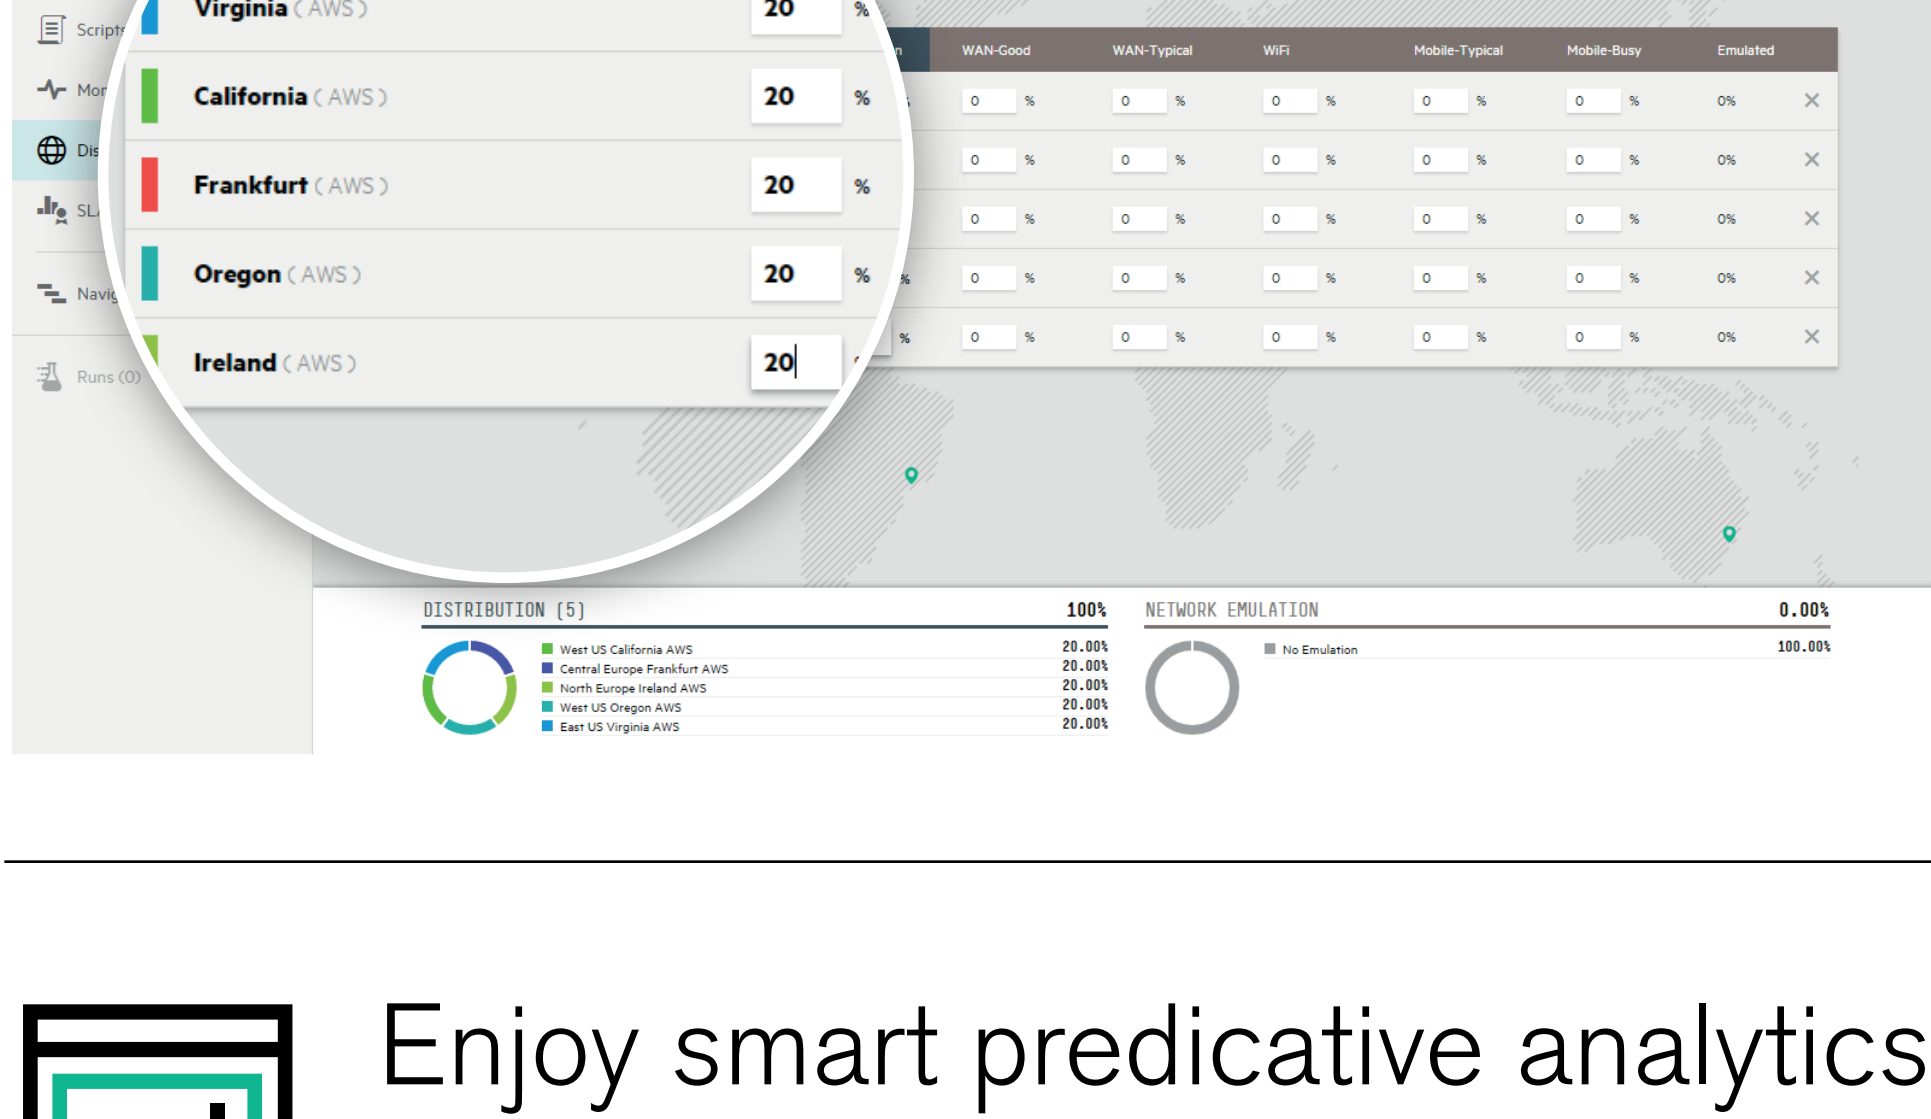

Integrate with your DevOps cycle

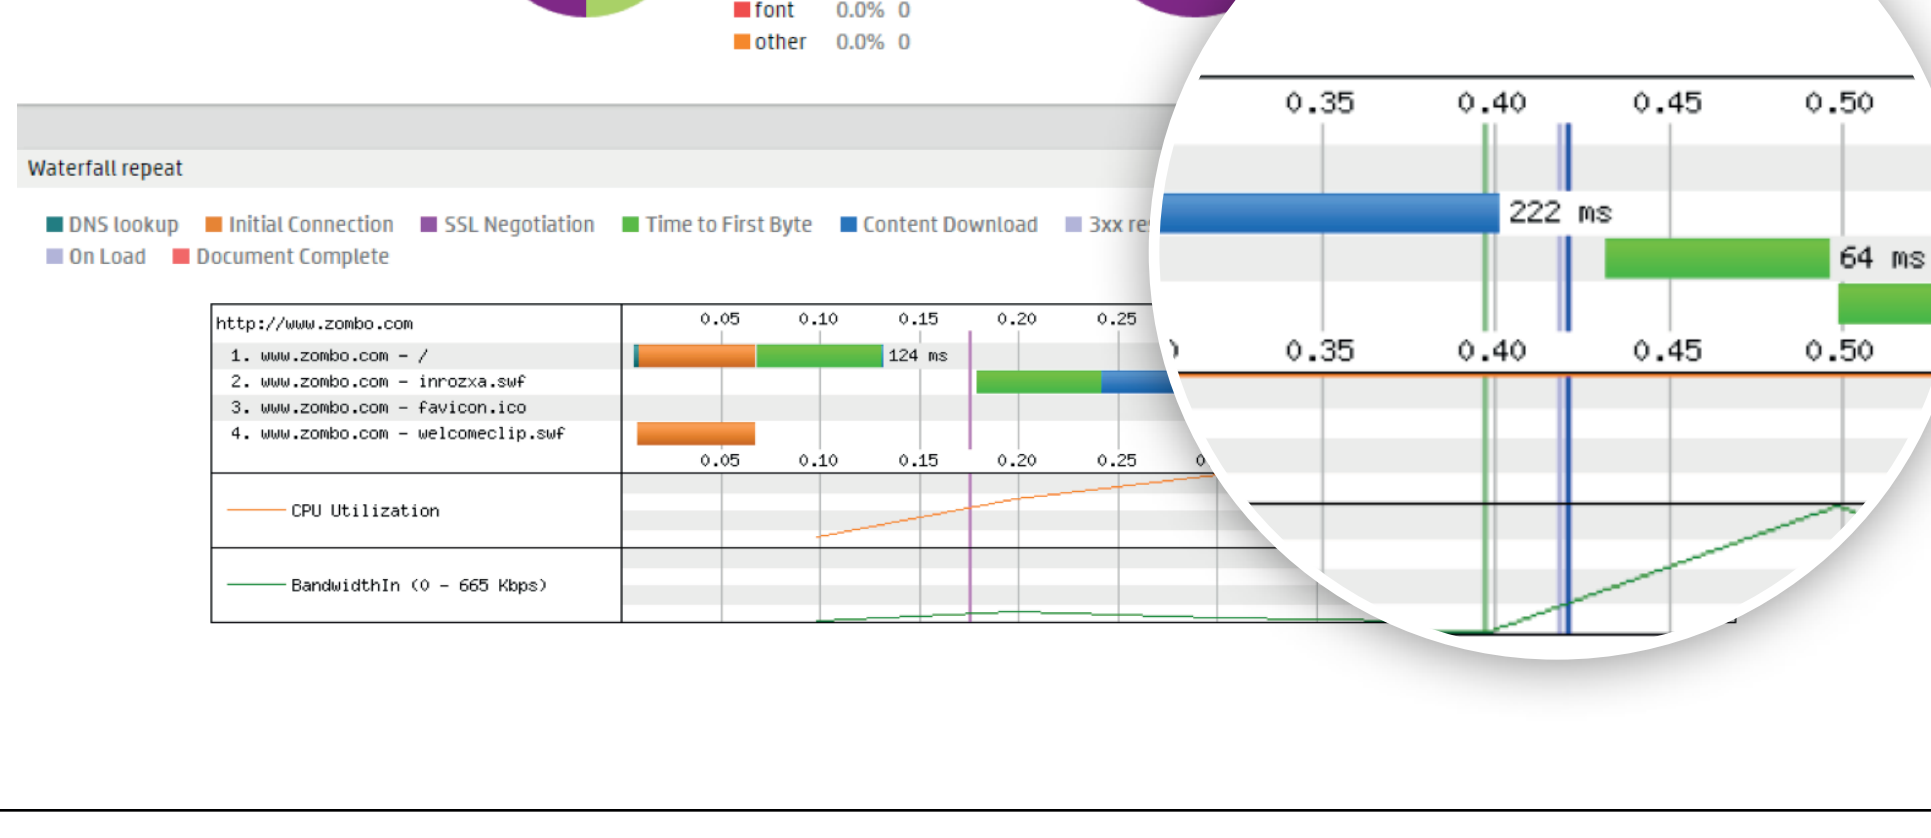

Scale

1 → 1,000,000+

in minutes *while* generating load from different cloud locations

Enjoy smart predicative analytics. In Real Time!

StormRunner Load is excellent for

- Burst Testing**
Existing LR/PC customer who needs to run MASSIVE cloud based (and feel free to re-use LoadRunner/Performance Center, TruClient and Web/HTTP scripts)
- Agile Projects**
StormRunner Load makes it easy to script and test early in the lifecycle and integrates into agile build processes for automated performance testing

Did you know...

- Reusable**
StormRunner Load can re-use LoadRunner/Performance Center TruClient and Web/HTTP scripts
- ISO certified**
Because StormRunner lives exclusively in the cloud, security is a priority for us. So the product is ISO certified
- Scalable and affordable**
StormRunner can scale higher, quicker and easier, and until proven otherwise it is the most affordable website load testing solution on the market:
 - VUH license – pay only for what you test.
 - No additional hidden costs

Oh, and one more thing...

StormRunner Load is now an enterprise-ready performance testing solution

- Project Management**
 - Have visibility into many projects simultaneously
 - See test results and generate reports per project
 - Allocate licensees and determine future usage
 - Collaborate better
- Folder Structure/Tagging**
 - Quickly filter specific product version or features
 - Easily find and edit particular scripts
 - Organize and manage long list of scripts
